

ACTIVATOR AEROSOL STEP 1

PRODUCT SIZE	: 200ml aerosol. Available in bulk.
DESCRIPTION	: Increases the rate of cure of Cyanoacrylate Adhesives (super glues) Improves bonding to difficult surfaces such as acidic materials ie. woods. Prevents penetration of adhesive into porous materials. Improves the cure of adhesive fillets. For use with Adlock Cyanoacrylate Adhesives. Speeds strength development to permit immediate use of the part.
APPLICATION INSTRUCTIONS	: Remove oil and grease contamination. Remove any old adhesive before applying. For difficult surfaces apply the activator first; for fillets apply the super glue first. Ultimate speed depends on adhesive type and viscosity.
LIMITATIONS	: Correctly used Eurobond Activator will reduce bloom. Care should be taken when spraying on to certain plastic for compatibility test before using.
HEALTH & SAFETY	: Hand and eye protection must be worn. Avoid breathing vapours. Keep out of reach of children. Pressurized aerosol containing highly flammable material. See separate safety data sheet for full details.
STORAGE	: Store in a closed upright container between 3 & 20 °C. Do not store near sources of heat or in direct sunlight. Minimum shelf life 12 months.
